

## IBM Rational Rhapsody Shortcuts

| <b>Project</b>                                    |                         |  |
|---|-------------------------|--|
| New Project                                       | <b>Ctrl + N</b>         |  |
| Open Project                                      | <b>Ctrl + O</b>         |  |
| Print   | <b>Ctrl + P</b>         |  |
| Undo  | <b>Ctrl + Z</b>         |  |
| Redo  | <b>Ctrl + Y</b>         |  |
| Save  | <b>Ctrl + S</b>         | Typically saves the model, if you are focused on code (for example, using Edit Code), this shortcut saves the file, not the model. |
| <b>Search</b>                                     |                         |  |
| Search in Model                                   | <b>Ctrl + F</b>         |  |
| Advanced Search and Replace                       | <b>Ctrl + H</b>         |  |
| Search inside selected                            | <b>Ctrl + Alt + F</b>   |  |
| Search in Diagram                                 | <b>Ctrl + Shift + F</b> |  |
| <b>Accelerators and modifiers within diagrams</b> |                         |  |
| Refresh Diagram                                   | <b>F5</b>               |  |
| Locate in Browser                                 | <b>Ctrl + L</b>         |  |
| Show References                                   | <b>Ctrl + R</b>         |  |
| Delete from View                                  | <b>Delete</b>           | Depends on context :All diagrams except Statecharts and Activity Diagrams  |
| Delete from Model                                 | <b>Ctrl + Delete</b>    |  |
| Populate  | <b>Ctrl + Alt + S</b>   |  |
| Add / Remove to selection                         | <b>Shift + Click</b>    |  |
| Select All  | <b>Ctrl + A</b>         |  |
| Select by Area                                    | <b>Ctrl + Alt + A</b>   |  |
| Select same Type                                  | <b>Ctrl + Alt + T</b>   |  |
| Select next shape (by proximity)                  | <b>Ctrl + Alt + N</b>   |  |
| Expand to fit Text                                | <b>Ctrl + E</b>         |  |
| Move Elements                                     | <b>← → ↑ ↓</b>          |  |

|   |  |  |
|---|--|--|
| Move Elements Slightly                      | <b>Ctrl + ← → ↑ ↓</b>                  |  |
| Move shape without containments             | <b>Alt + ← → ↑ ↓</b>                   |  |
| Resize Shape without containment            | <b>Alt</b>                             | While dragging   |
| Add new item (Compartments Only)            | <b>Insert</b>                          | Add a new item to a list in compartment (for example, the attributes compartment of a class box). Insert (This shortcut works only if you already have a list. It does not work for the first item in a list.) |
| Add Space (Sequence Diagram only)           | <b>Shift + Click (Mouse)</b>           | <b>Shift + Click</b> in diagram, to see a dashed, horizontal bar. Hold and move the bar down to create more space, or move it up to eliminate unnecessary space.   |
| Resize symmetrical                          | <b>Ctrl + dragging</b>                 | Pressing <b>Ctrl</b> while dragging will resize elements symmetrical (horizontally or vertically or with lock aspect sizing when dragging on corner)   |
| Change the selection anchor                 | <b>Ctrl + Click (Mouse)</b>            |  |
| Insert a new user point in a line or arrow. | <b>Ctrl + Click (Mouse)</b>            | Does not apply to rectilinear lines or to sequence diagram messages.   |
| Draw Straight Line                          | Press <b>Ctrl</b> while drawing a line | Straight lines and arrows that are parallel to the axis. While you draw lines.   |
| <b>Accelerators for Zooming in Diagram</b>  |  |  |
| Zoom In                                     | <b>Ctrl + (+)</b>                      |  |
| Zoom out                                    | <b>Ctrl + (-)</b>                      |  |
| Zoom to Fit                                 | <b>F6</b>                              |  |
| Undo Zoom.                                  | <b>Shift + F6</b>                      |  |

| <b>Accelerator Windows</b>    |                             |                          |
|-------------------------------|-----------------------------|--------------------------|
| Open Active Code View         | <b>Alt + 2</b>              |                          |
| Open Features window          | <b>Alt + Enter</b>          |                          |
| Open Close Browser            | <b>Alt + 0</b>              |                          |
| Open Close Output Window      | <b>Alt + 3</b>              |                          |
| Open Close Birds Eye          | <b>Alt + 5</b>              |                          |
| Show Tooltip                  | <b>Ctrl + 2</b>             |                          |
| Enhanced ToolTip              | <b>Shift + Alt + F2</b>     |                          |
| Full Screen Mode              | <b>Shift + Alt + Enter</b>  |                          |
| Arrange Options               | <b>Ctrl + W</b>             |                          |
| Close Active Diagram          | <b>Ctrl + F4</b>            |                          |
| <b>Accelerator in Browser</b> |                             |                          |
| Edit                          | <b>F2</b>                   |                          |
| Copy                          | <b>Ctrl + C</b>             |                          |
| Paste                         | <b>Ctrl + V</b>             |                          |
| Cut                           | <b>Ctrl + X</b>             |                          |
| Copy(Paste)                   | <b>Ctrl + drag</b>          |                          |
| Del                           | <b>Delete from Model</b>    |                          |
| Locate on Diagram,            | <b>Ctrl + Shift + L</b>     |                          |
| Search Inside                 | <b>Ctrl + Alt + F</b>       |                          |
| References                    | <b>Ctrl + R</b>             |                          |
| Add to Favorites              | <b>Ctrl + D</b>             |                          |
| Locate in IDE                 | <b>Ctrl + Alt + K</b>       | Visual Studio or Eclipse |
| Expand underneath             | <b>→</b>                    |                          |
| Collapse expanded part        | <b>←</b>                    |                          |
| Expand All                    | <b>Press * in Num-Block</b> |                          |

| <b>Code</b>                   |                          |  |
|-------------------------------|--------------------------|--|
| Generate                      | <b>Ctrl + F7</b>         |  |
| Generate Focused View         | <b>Shift + F5</b>        |  |
| Build                         | <b>F7</b>                |  |
| Build with all Dependencies   | <b>Alt + F7</b>          |  |
| Rebuild                       | <b>Shift + F7</b>        |  |
| ReBuild with all Dependencies | <b>Alt + Shift + F7</b>  |  |
| Run                           | <b>Ctrl + F5</b>         |  |
| Generate Make Run             | <b>Ctrl + Shift + F5</b> |  |
| Stop Build or Execution       | <b>Ctrl + Break</b>      |  |
| Roundtrip                     | <b>F5</b>                |  |
| Intellivisor                  | <b>Ctrl + Space</b>      |  |
| <b>Animation</b>              |                          |  |
| Go                            | <b>F4</b>                |  |
| Go Event                      | <b>F10</b>               |  |
| Quit animation                | <b>Shift + F5</b>        |  |

| Useful MS Windows Shortcuts in Rhapsody  |  |   |
|--|--|---|
| Close the currently active window.   | <b>Ctrl+F4</b>   | If you hold down Ctrl+F4, all the Rhapsody windows close in succession. Note that this method will not work if you have a diagram that needs to be saved (for example, an ASD)—so using this “close all” method does not put your unsaved work at risk. |
| Enable or disable check boxes.   | <b>Space</b>   |   |
| Get to the Windows menu.   | <b>Alt+space</b>   |   |
| Invoke IntelliVisor when editing code or names of graphic elements.  | <b>Ctrl+space</b>  |   |
| Navigate between open diagrams. Ctrl+Shift+Tab   | <b>Ctrl + Shift +Tab</b>   |   |
| Navigate between fields when in a dialog box.  | <b>Tab</b>   | To do the same in reverse order, use <b>Shift+Tab</b> .   |
| Navigate between tabs when in a dialog box (for example, the features dialog box).                                 | <b>Ctrl + Tab</b>  | To do the same in reverse order, use <b>Ctrl+Shift+Tab</b>  |
| Navigate to items in lists (such as the list of element types in the Search/Replace dialog box) or in the browser. | <b>Type its name on the keyboard.</b>  |   |
| Navigate within the browser.   | <b>Use the up and down keys to move between nodes. Use the left and right arrow keys to expand or collapse tree nodes.</b> |   |
